DETAILED ACTION

Allowable Subject Matter

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art fails to show a decimation filter for use in A/D conversion, comprising a coefficient word length of a last-stage FIR filter is shorter than a coefficient word length which enables desirable attenuation in an inhibition zone of the last-stage FIR filter, such that there is caused a region where attenuation is insufficient in an inhibition region of the last-stage FIR filter; and an interpolation filter for use in D/A conversion comprising a coefficient word length of a first-stage FIR filter is shorter than coefficient word length which enables desirable attenuation in an inhibition zone of the first-stage FIR filter, such that there is caused a region where attenuation is insufficient in an inhibition region of the last-stage FIR filter as called for in claims 1 and 5. Therefore, claims 1-8 are allowed.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
